The most current Sentinel is a combined Mar/Apr. The National SE has added a section for cadet program safety. He is also asking for cadet related safety articles. I encourage you and you cadets to submit cadet safety articles.

As today's storms remind us, it tis the season for dangerous weather. Keep re-enforcing safety plans to enact when this weather turns bad, many times without warning. This will be a re-occurring theme in the safety briefing emails until November.

Please feel free to email me comments and suggestion.
